PROFESSIONAL SUMMARY

Bilingual operations and business process professional with 5+ years of experience in KPI development, operational reporting, data quality and stakeholder coordination. Reviewed performance data for management decisions, prepared recurring and ad hoc reports, and served as a point of contact between clients and suppliers. Focused on reliable information, clear escalation paths and repeatable workflows.

CORE COMPETENCIES

KPI Design & Performance Management | Business Process Analysis | Operational Quality Assurance | Ad Hoc & Executive Reporting | Data Validation & Reconciliation | SOPs & Workflow Design | Root-Cause Analysis | Cross-Functional Stakeholder Management | Requirements Gathering | Automation Scoping

PROFESSIONAL EXPERIENCE

goFLUENT México Digital Training | LA Operations Support Specialist (progressed from Learning Advisor)
Dec 2024 - Jul 2026

- Developed and refined operational KPIs and performance evaluation criteria with management; reviewed operational data daily for management and stakeholders, investigating metric gaps, anomalies and process drivers.
- Conducted independent quality checks of advisor scorecards and performance data supporting management's promotion and offboarding reviews; provided validated information without making offboarding decisions or administering the process.
- Produced approximately 12 reports and ad hoc analyses daily using Tableau extracts, Excel, Google Sheets and CSV data. Reporting schedules included daily, weekly, biweekly, monthly, quarterly, semiannual and annual cycles, plus new requests.
- Monitored call activity, retention, learner usage, training hours, emails sent and received, answered and unread WhatsApp messages, response times and escalations.
- Built Google Sheets reporting displays from CSV data with Google Apps Script, using Gemini and ChatGPT for development support; reconciled outputs against Tableau extracts.
- Reconciled organizational-unit records across multiple sources, identified unmatched entries and discrepancies, and documented validation and follow-up requirements.
- Designed and updated SOPs, decision rules, validation steps, handover instructions and escalation workflows to support coverage of reporting, incident handling, contact updates and approval controls.
- Investigated discrepancies using system logs, timestamps and cross-team records; documented findings, evidence limits and potential root causes for review and escalation.
- Defined functional requirements and phased implementation plans for proposed performance dashboards, email routing automation and guided enrollment workflows.

HH Global | Business Analyst, Operations Execution | 2021 - Jun 2024

- Served as the point of contact between a supplier portfolio and the client, coordinating operational communication across purchase orders, production, delivery milestones and invoicing for international beverage accounts.
- Flagged pricing, purchase-order, billing and documentation discrepancies and escalated them to Shipping and Billing for review.
- Participated in several calls each week with the client-facing team and directly with the client to discuss operational status and discrepancies.
- Designed workflow improvements for production status updates, proof-of-delivery collection, approvals and payment follow-up; maintained reporting and stakeholder communication across overlapping deadlines.

SELECTED PROJECTS

Weekly Performance Reporting & Continuity | Operational workflow

Used AI-assisted processing and Google Sheets displays built with Apps Script from CSV data, reconciling outputs against Tableau. Documented assignment rules, validation checks, exception handling and handover steps for coverage during absences.

Independent Lesson-Quality Investigation | Completed analysis

Compared lesson logs, timestamps and operational notes across virtual classroom platforms; documented potential protocol deviations, possible attendance misclassification and evidence-based recommendations for review and escalation.

Interactive Enrollment Wizard | Business proposal

Authored a guided-workflow concept with conditional routing, compliance checkpoints, stepwise enrollment support and automatically formatted CRM notes; defined process maps and functional requirements.

Automated Performance Intelligence Pilot | Presented & tested pilot

Defined reporting requirements, composite ranking logic and a planned shadow-run comparison. Presented and tested the pilot; expansion and broader implementation remained pending.

ADDITIONAL EXPERIENCE

Revista Iconema | Freelance Scientific & Academic Translator | Since 2020

Translated scientific and academic content between Spanish and English, preserving technical terminology, context and clarity for specialist audiences.

Kelly Services / LanguageLine Solutions | Medical Interpreter | Sep - Nov 2024

Delivered live Spanish-English interpretation in complex, time-sensitive healthcare and service interactions requiring precision and discretion.

DSV Global Transport and Logistics | Carrier Sales Representative | Jul - Aug 2024

Coordinated carrier communication, shipment updates, pickup/delivery schedules and proof-of-delivery information.

TOOLS & METHODS

Excel (data validation, VLOOKUP) | Google Sheets & Apps Script | Tableau reporting/extracts | CSV processing | Google Workspace | Asana | CRM and internal administration tools | AI-assisted reporting workflows (Gemini/ChatGPT) | Process mapping | Operational documentation

EDUCATION & CERTIFICATIONS

B.A. in International Relations | Universidad de las Américas, Mexico City

Microsoft Office Specialist | Excel, Word, PowerPoint

Languages: Spanish (native); English (bilingual proficiency, TOEFL ITP 653)
