PROFESSIONAL SUMMARY

Bilingual operations and business process professional with 5+ years of experience in cross-functional operations, KPI design, performance quality assurance, reporting, and process improvement. Developed and refined performance indicators with management, conducted independent data checks informing personnel and operational decisions, and delivered approximately 12 reports and ad hoc analyses per day for stakeholders across the organization, including executive leadership. Focused on reliable data, scalable workflows, and reducing unnecessary complexity for frontline teams.

CORE COMPETENCIES

KPI Design & Performance Management | Business Process Analysis | Operational Quality Assurance | Ad Hoc & Executive Reporting | Data Validation & Reconciliation | SOPs & Workflow Design | Root-Cause Analysis | Cross-Functional Stakeholder Management | Requirements Gathering | Automation Scoping

PROFESSIONAL EXPERIENCE

goFLUENT México Digital Training | LA Operations Support Specialist (progressed from Learning Advisor) | Dec 2024 – Jul 2026

- Designed, revised, and challenged operational KPIs and performance evaluation criteria with management; investigated metric gaps, anomalies, and process drivers affecting performance outcomes.
- Conducted independent quality checks of advisor scorecards and performance data used by management in promotion reviews and other performance-related personnel decisions.
- Produced approximately 12 recurring and ad hoc reports or analyses daily using Tableau extracts, Excel, Google Sheets, and CSV data to answer operational questions for team leaders, departments, management, and executive stakeholders.
- Built and maintained reporting workflows covering learner activity, training hours, quizzes, 1:1 attendance, no-shows, enrollment, renewals, regional performance, and targets; validated source data and reconciled inconsistent assignments.
- Reconciled organizational-unit records across multiple sources, identified unmatched entries and discrepancies, and documented validation and follow-up requirements.
- Designed and updated SOPs, decision rules, handover instructions, and escalation workflows covering assignment changes, reporting, incident handling, contact management, and approval controls for cross-regional operations.
- Investigated technical and operational defects using system logs, records, and cross-team evidence; documented potential root causes and recommended improvements to prevent recurring issues and inaccurate performance attribution.
- Defined functional requirements and phased implementation plans for proposed performance dashboards, email routing automation, and guided enrollment workflows.

HH Global | Business Analyst, Operations Execution | 2021 – Jun 2024

- Coordinated operational execution for international beverage accounts, collaborating with suppliers across purchase orders, production, delivery milestones, and invoicing.
- Investigated and resolved pricing, purchase-order, billing, and documentation discrepancies through supplier and internal-team follow-up, maintaining accurate operational records.
- Designed workflow improvements for production status updates, proof-of-delivery collection, approvals, and payment follow-up; maintained reporting and stakeholder communication across overlapping deadlines.

SELECTED PROJECTS

Weekly Performance Reporting & Continuity | *Operational workflow*

Documented Tableau-to-Excel/Google Sheets reporting, including CSV cleaning, advisor assignment rules, VLOOKUP checks, AI-assisted data transformation prompts, exception handling, and handover instructions for coverage during absences.

Independent Lesson-Quality Investigation | *Completed analysis*

Reviewed lesson logs and transitions between virtual classroom platforms to document potential protocol deviations, attendance misclassification, and evidence-based improvements to escalation and quality controls.

Interactive Enrollment Wizard | *Business proposal*

Authored a guided-workflow concept with conditional routing, compliance checkpoints, stepwise enrollment support, and automatically formatted CRM notes; defined process maps and functional requirements.

Automated Performance Intelligence Pilot | *Business proposal*

Specified daily Tableau reporting requirements, weighted ranking logic, validation through a shadow-run comparison, and a staged pilot plan to reduce dependence on manually maintained spreadsheets.

ADDITIONAL EXPERIENCE

Revista Iconema | Freelance Scientific & Academic Translator | Since 2020

Translated scientific and academic content between Spanish and English, preserving technical terminology, context, and clarity for specialist audiences.

Kelly Services / LanguageLine Solutions | Medical Interpreter | Sep – Nov 2024

Delivered live Spanish-English interpretation in complex, time-sensitive healthcare and service interactions requiring precision and discretion.

DSV Global Transport and Logistics | Carrier Sales Representative | Jul – Aug 2024

Coordinated carrier communication, shipment updates, pickup/delivery schedules, and proof-of-delivery information.

TOOLS & METHODS

Excel (data validation, VLOOKUP) | Google Sheets | Tableau reporting/extracts | CSV processing | Google Workspace | Asana | CRM and internal administration tools | AI-assisted reporting workflows (Gemini/ChatGPT) | Process mapping | Operational documentation
